[Traffic Policing And Shaping](#)

Download

---

There are two methods to limit the amount of traffic originating from an interface: policing and shaping. When an interface is policed outbound, .... Traffic policing and traffic shaping have the following differences: Traffic policing directly discards packets with rates that are greater than the traffic policing rate. Traffic shaping, however, buffers packets with rates that are greater than the traffic shaping rate and sends the buffered packets at an even rate.. Overview of traffic policing and traffic shaping configuration when implementing Quality of Service (QoS) on a network.

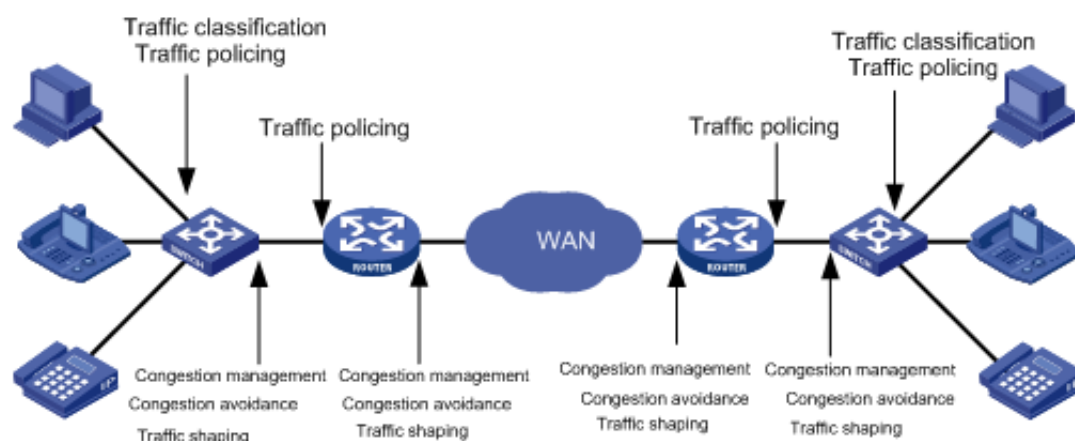

1. [traffic policing shaping](#)
